Please use the following instructions when submitting your album covers for imprinting:

- Remove the album covers and/or spines to be imprinted.
- Complete and attach a separate work order for EACH album.
- If you would like us to match another cover/spine, include it with your order.
- Be sure to include your phone number and/or e-mail address in case we have questions regarding your order.
- Write the text out EXACTLY as you would like it to appear. Use upper and lower case and underline each letter to be Capitalized.
- Specify the desired foil color.
- Circle the desired type size and style (*we will default to the next smallest size if the one you choose is too large for the space provided*).
- There is a 2-line maximum for any given area. Graphics may be added to these 2 lines (3 lines of text in one area will not imprint evenly, therefore is unavailable) except on the upper center of Creative Memories albums with foil borders.
- Imprinting is generally limited to the areas specified in the diagram on the work order. Please ask if you have a special request and we will try to accommodate your request.
- Imprinting direction is limited to those shown on the diagram. Horizontal spine imprints should be less than 1.5" long.
- Please include credit card information – at this time we only accept Visa and MasterCard.. Zip code and CVV code are required.

Some things you should know about hot foil imprinting:

- Not all albums can be imprinted. Highly textured album covers (tapestry, denim) as well as plastic/vinyl album covers cannot be imprinted. **Pioneer albums CANNOT be imprinted.** Please contact us before sending your albums if you are concerned. We offer a variety of metal plates that can be embossed and attached to these albums with excellent results.
- Different textures result in different imprinting quality. Albums with open-weave finishes will have a grainier imprint than those with leatherette-type (Mrs. Grossman's) or tight-weave cloth (Creative Memories) finishes. We guarantee the accuracy of our imprinting – quality will be dependent on the quality of the album being imprinted.
- Leather albums imprint beautifully, but due to oils in the leather, the imprinting foil will age over time, giving it a distressed look.
- Older albums that have been handled frequently may not imprint as well as new albums. Please wipe down older albums with a cloth to remove oily hand residue before sending.
